

CWB CLASSIC

VAPOR PRESSURE OF LIQUEFIED PETROLEUM GASES (LPG)

STANDARDS

ASTM D 1267, IP 161, ISO 4256 and related methods.

SCOPE

This test method covers the determination of the gage vapor pressures of liquefied petroleum gas products at temperatures of 37.8°C up to and including a test temperature of 70°C. Determination of the vapor pressure of LPG is important for safety reasons to ensure that the maximum operating design pressures of storage, handling, and fuel systems will not be exceeded under normal operating temperature conditions.

SPECIFICATIONS

Key features

- Electronic constant thermostatic bath
- Capacity of 75 L
- 3 vessels capacity
- Thermometer and digital display
- Temperature range: ambient to 100°C
- Cooling coil for external cooling
- Drain cock

Safety

- Low water cut-off
- Safety burst disk capsule (optional)

Accessories

- VAPOR PRESSURE GAUGES at choice
- REF 941921 LPG test vessel
- REF 23206 Cryostat
- OPTION Digital Thermometer

941921

ORDERING INFORMATION

941432

Scope of delivery:

CWB Classic is delivered with:

- 3 test vessels holders
- 1 ASTM 12C thermometer (P/N 11499)*
- 1 ASTM 18C thermometer (P/N 11505)*

**Without certificate, calibration on request*

Site requirements:

- Power supply: AC 230 V, 50 Hz - 10 A
- Dimension:(W) 470x (D) 470x (H) 860 mm
- Weight: 30 kg

Fluid: 60L distilled water

According to your application, accessories and options must be ordered separately.
